

At the moment schools are following Government rules.

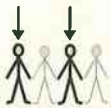

This is because the Government doesn't want the Corona virus to

spread to everyone.

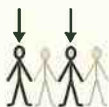

Most children will be OK and will be OK to go to school.

Some adults are old or already be ill with something else

and they might not be OK with Corona virus.

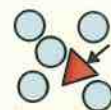

So some children might be OK in school and will continue to

attend some children might have to stay home.

       
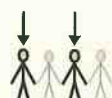

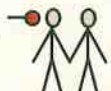

Some schools might only have a few children in different year

       
groups and all of the children might be mixed together

       
because some of the teachers in school might be ill and

        
can't teach in school and they will have to stay home too.

         
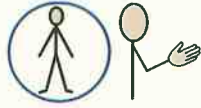

So some children might see their friends at school and

     
some might not. This might be because:-

     
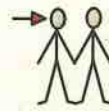

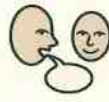

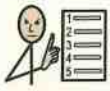

The school might not have enough teachers.

    
The child might be ill

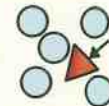

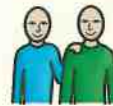

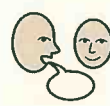

The child's parent/carer might be ill or have a medical

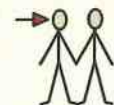

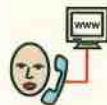

condition that their Dr has told them to stay home.

You maybe able to contact your friends in different ways,

ask an adult how you can do this. You might use a

phone, computer, facetime or skype or write/text to them.
